

## 7. LIST OF PUBLICATION OF THE LABORATORY UNTIL DECEMBER 1994

compiled by

ZS. PAPP

*Cell Biological and Evolutionary Micropaleontological Laboratory of the Department of Botany of the J. A. University, H-6701, P. O. Box 657, Szeged, Hungary*

- ALVAREZ RAMIS, C., KEDVES, M. – FERNÁNDEZ MARRÓN, T. (1994): Consideraciones en torno a las asociaciones esporopolínicas del Cretácico superior del Cerro de La Mesa (Guadalupe de La Sierra, Madrid). – *Plant Cell Biology and Development (Szeged)* 5, 42–51.
- GOTTL, E. (1993a): The thermal alterations of the pollen grains of *Viscum album* L. (*Loranthaceae*, s. str. *Viscaceae*). Short communication. – *Plant Cell Biology and Development (Szeged)* 4, 74–77.
- GOTTL, E. (1993b): List of publication of M. Kedves I. – *Plant Cell Biology and Development (Szeged)* 4, 81–88.
- GOTTL, E. (1994): List of publication of M. Kedves II. – *Plant Cell Biology and Development (Szeged)* 5, 87–99.
- JELEN, B., BREZIGAR, A., BUSER, S., CIMERMAN, F., DROBNE, K., MONOSTORI, M., KEDVES, M., PAVLOVEC, R., PAVŠIČ, J. – SKABERNE, D. (1994): Razrešavanje problema stratigrafije Oligocena in spodnjega Miocena v Sloveniji. – *Rudarsko-Metalurški Zbornik* 33, Abstracts, 11th Slovenian Geol. Meeting, Ljubljana 17–18.
- JELEN, B., KEDVES, M., SKABERNE, D., BREZIGAR, A., BUSER, S., CIMERMAN, F., DROBNE, K., MONOSTORI, M., PAVLOVEC, R. – PAVŠIČ, J. (1994): Dorog type (Middle Eocene) spore-pollen assemblage in the Socka Beds of Slovenia I. – *Plant Cell Biology and Development (Szeged)* 5, 20–28.
- KEDVES, M. (1993): Plant microfossils from the Jurassic manganese ore layers of Úrkút, Hungary. – *Plant Cell Biology and Development (Szeged)* 4, 11–21.
- KEDVES, M. (1994a): Transmission electron microscopy of the fossil *gymnosperm* exines. – Szeged.
- KEDVES, M. (1994b): To the tenth anniversary of the discovery of quasicrystals. – *Plant Cell Biology and Development (Szeged)* 5, 9–10.
- KEDVES, M. (1994c): Plant microfossils from the Upper Cretaceous and Lower Tertiary layers of Northern Spain I. – *Plant Cell Biology and Development (Szeged)* 5, 29–41.
- KEDVES, M. (1994d): Effect of the high temperature on the spores and pollen grains. – In: *Polen y esporas: Contribucion a su conocimiento* ed.: I. LA SERNA RAMOS. – VIII Simposio de Palinologia (A.P.L.E.), Ser. Inf. 35, 63–69.
- KEDVES, M. (1994e): Paléophytogéographie du Crétacé supérieur de l'Afrique sur base de données palynologiques. – 2ème Symp. Palynol. Africaine, résumés.
- KEDVES, M., ALVAREZ RAMIS, C. – FERNÁNDEZ MARRÓN, M. T. (1993): Sobre pólenes breviazones procedentes del Cretácico superior del Borde Sur de la Sierra de Guadarrama (Provincia de Madrid, España). – *Plant Cell Biology and Development (Szeged)* 4, 22–25.
- KEDVES, M. – BAGI, I. (1993): Études palynologiques et pédologiques sur les sédiments holocènes de la piscine du Monastère du Mont Jakab. – APLF XIII<sup>e</sup> Symposium "Homme – Milieu Palynologie et Événements Cycliques", Besançon, programme et résumés, 56.
- KEDVES, M. – GÁSPÁR, I. (1994a): Chronicle. – *Plant Cell Biology and Development (Szeged)* 5, 101–102.
- KEDVES, M. – GÁSPÁR, I. (1994b): Les altérations secondaires des spores et des grains de pollen dissous partiellement. – X Simposio de Palinologia A.P.L.E., Valencia, programa y resúmenes, 53.

- KEDVES, M. – GÁSPÁR, I. (1994c): Les altérations secondaires des spores et des grains de pollen dissous partiellement. – *Trabajos de Palinología Básica y Aplicada X Simposio de palinología (A.P.L.E.)*, Univ. deValencia, 153–161.
- KEDVES, M. – GÁSPÁR, I. (1994d): Altérations secondaires de certain sporomorphes sous l'influence des rayon X. – 2ème Symp. Palynol. Africaine, résumés.
- KEDVES, M. – KINCSEK, I. (1993): Biopolymer organization of the wall of the fossil spores and pollen grains. – *Plant Cell Biology and Development (Szeged)* 4, 26–33.
- KEDVES, M. – PÁRDUTZ, Á. (1993): Negative quasi-crystalloid biopolymer network from the exospore of *Equisetum arvense* L. Short communication. – *Plant Cell Biology and Development (Szeged)* 4, 78–80.
- KEDVES, M. – ROJIK, I. (1993): Biopolymer organization of the exine of *Juniperus virginiana* L., and *Taxus baccata* L. – *Plant Cell Biology and Development (Szeged)* 4, 49–63.
- KEDVES, M. – ROJIK, I. (1994a): TEM study of the “infected” pollen grains of *Thalictrum flavum* L. with *Gliocladium roseum* (LINK) BAINIER. Short communication. – *Plant Cell Biology and Development (Szeged)* 5, 52–57.
- KEDVES, M. – ROJIK, I. (1994b): Buckminsterfullerene-like biopolymer units from the exine of *Thalictrum flavum* L. – *Plant Cell Biology and Development (Szeged)* 5, 58–66.
- KEDVES, M. – TÓTH, A. (1993): High temperature effect on the spores of *Ustilago maydis* (DE CANDOLLE) CORDA. – *Plant Cell Biology and Development (Szeged)* 4, 34–48.
- KEDVES, M. – TÓTH, A. (1994): Premiers résultats du système de biopolymère stabilisateur du squelette quasi-cristalloïde de l'exine. – *Plant Cell Biology and Development (Szeged)* 5, 79–86.
- KEDVES, M., TÓTH, A. – FARKAS, E. (1993): An experimental investigation of the biopolymer organization of both recent and fossil sporoderms. – *Grana Suppl. I*, 40–48.
- KEDVES, M., TÓTH, A. – GOTTL, E. (1994): Incomplete and non-fivefold rotation of the basic biopolymer unit of the exine of *Pinus griffithii* MCCLELL. – *Plant Cell Biology and Development (Szeged)* 5, 67–78.
- KEDVES, M., TÓTH, A., MÉSZÁROS, K., BORBOLA, A. – AILER, P. (1993): Recent modelling of the major evolutionary degrees of early *angiosperm* pollen types. – *Plant Cell Biology and Development (Szeged)* 4, 64–73.
- KEDVES, M., TÓTH, A. – VÉR, A. (1993): Radial fivefold rotation: A new method in the study of the biopolymer organization of the sporoderm. – XV Int. Bot. Congr. Yokohama, Abstracts, 28.
- SAJGÓ, CS., HETÉNYI, M. – KEDVES, M. (1993): Palynology and organic geochemistry of Tertiary low-rank coals in Hungary – II. Non-aromatic hydrocarbons. – *Organic Geochemistry*, Poster sessions from the 16th Int. Meeting on Organic Geochemistry, Stavanger, 335–338.
- VÉR, A. (1994): LM investigations of different stained fossil *Botryococcus* colonies. – *Plant Cell Biology and Development (Szeged)* 5, 11–19.
